

Newington Inland Wetlands Commission – (Application for Permit)

Attachment Page

By 249 Day Street, LLC concerning 249 Day Street

The modification requested is to allow increased parking on the site. The Commission has already approved the use of the site for the parking of fifty Eversource heavy-duty specially constructed repair trucks with buckets, and the permit modification being sought is to allow for the use of the location for an increased amount of such vehicles, namely to allow for as many as seventy-five such trucks to be parked there. It is not anticipated that there will be any short term or long term environmental impacts as a result of such an increase. The trucks are to be parked there by Eversource for an indefinite period of time so that they will be available for Mirabelli Automotive, which has its service garage across the street at 182 Day Street, to start the trucks on a regular basis, to service them on a regular basis, and to keep them ready for emergency use whenever there are electrical power outages. The proposed usage would not be in the wetland areas.
