Town of Newington
131 Cedar Street
Newington, CT 06111

Dear Town Manager Altshul,

At Eversource, we are dedicated to delivering reliable energy and providing excellent customer service. Our comprehensive vegetation management program includes year-round tree work to protect the electric system. This work is needed as day to day trees remain the leading cause of power outages, especially during storms in Connecticut.

Statewide, our data shows a continued need for regular tree maintenance due to challenges posed by drought, tree disease, and increasingly intense storms. A total of 4,339 roadside distribution miles are planned under the 2026 scheduled maintenance program. Eversource's Vegetation Management team inspects and assesses trees along these miles, prioritizing and performing tree work to maximize system reliability for the greatest number of customers. Included in this mailing is a map of the town with the roads scheduled for vegetation assessment highlighted. Scheduled maintenance tree work in your town is estimated to begin in July.

If residents have questions about this work, they are encouraged to contact Eversource directly at 800-286-2000. Representatives from Eversource's tree contractor will make direct contact with affected property owners, in coordination with the town, where vegetation work is required. Prior to any work taking place, impacted properties will be notified and provided with additional information.

Sincerely,

Sam Carmody
Community Relations
